So you'll mostly train your listening comprehension in English. You'll learn to understand dialogues, phone calls, and descriptions. To make listening and understanding easier, you get support with the right methods to listen: Learn how to assign images to listening texts and use prior knowledge and contextual insights when reading and listening to texts. All of this can be a lot of fun and the English language is becoming more and more familiar to you. Since the texts revolve around everyday topics such as shopping, leisure or food and drink, at the same time you will expand your vocabulary. But you're also learning other things this year. For example, you will learn important words related to animal themes, year, numbers, time, clothing, and colors and bodies. Of course, you also learn to talk to others, that is, to say hello, to say goodbye, to thank and imagine. Again, you'll get a lot of help in the methodology area, for example, you'll be shown how to learn vocabulary or create a mind map. The school topic is another important topic in Class 5. You'll know all the important words about school. Not only will you learn what english panel or table means, but you'll also learn all phrases in the classroom. For example, you can practice asking for help in class or what your teacher means with specific instructions. This way, you'll soon be able to follow the English lessons even better. On the other hand, these are also national studies, you can learn, for example, how school works in the UK. In the reading section, you have already started reading the correct texts. This can be a dialog box, blog post, or email. It gets exciting when you learn how to take information from real websites or a brochure. You will be amazed at how much you already understand when reading and how much knowledge you can acquire. But, of course, the writing area is also not neglected. Here you can find out how to create a plant profile (fact file), how to describe yourself and others, or how to describe your daily routine. It's a lot of fun when it comes to birthdays, because then you learn to write an invitation. In order to master the English language correctly and safely from the beginning, you will also gain a lot of knowledge in the field of language: you will practice how the correct position of the phrase works in English statement sentences and how you can ask questions. But not only that: you also learn that you use the simple present for habits and use the progressive present to describe an image, for example. This school year, you'll also learn to tell others something that happened yesterday or last week. To do this it is important to know the forms of the simple past.
